

Unlock the power of open geospatial

Non-technical, non-specialist users
can easily discover, create and
share location-based data,
maps and apps

Browser-based, easy to
deploy and configure
out of the box

Built on
open standards
with open API. Powerful
integration with existing
location-based technologies

Powered by  cartosys

Cartosys delivers all of the essential tools an organisation needs to successfully deploy location-based services. The Cartosys toolkit, built on open standards, integrates proven and supported open source tools into a single, out-of-the-box solution that is quick and easy to deploy, configure and manage, without the need for software coding.

- Built on open standards with an open API
- Integrates with your existing open source and COTS products
- Provides a rapid, cost effective way to deliver your geospatial needs

MODULES INCLUDE:

- **Cartosys Manage:** import data via drag and drop. Connect to third party datastores via OGC services.
- **Cartosys Edit:** editing of data including configurable validation rules and permissions.
- **Cartosys Catalogue:** INSPIRE compliant metadata catalogue with full text and spatial query capabilities.
- **Cartosys Maps:** create, style and publish maps publically or privately from any data in the catalogue.
- **Cartosys Apps:** create and publish geospatial applications by combing data layers and Cartosys tools.
- **Cartosys Mobile:** connected/disconnected access to data in the field
- **Cartosys Report:** create reports and/or dashboards.
- **Cartosys Share:** collaborate through the map, e.g. sharing scribbles, bookmarks, etc.
- **Cartosys Security:** manage permissions and authentication to control who can see what, and when.

KEY BENEFITS:

- ✓ **Open standards (OGC) compliant**
- ✓ **Supported open source**
- ✓ **Modular**
- ✓ **Browser based**
- ✓ **Plug-in free**
- ✓ **Cross platform**
- ✓ **Scalable**
- ✓ **Easy to configure**
- ✓ **Easy to integrate**
- ✓ **Easy to extend with apps**
